Visconti brand history

Visconti history starts in Italy, in the city of Florence, the capital of art and culture. Florence is also one of the largest districts of Italian Fashion and Luxury Industry.

A lot of inspiration comes from here and each product incorporates some of these distinctive features. Since so many years the name "Visconti" is synonymous of extraordinarily elegant writing instruments coming from very intense historical and technological research: fountain pens, rollers and ball-pens.

On one side Visconti has preserved, rediscovered, old craftsmanship techniques, making them suitable for pen instruments. Also, the research for new materials is a strong point of Visconti (i.e. Volcanic Lava, unidirectional carbon, cotto tile, ...).

Today Visconti is one of the most important player in the luxury pen world market and it has introduced many innovative technical solutions like lock system, double filler, travelling ink-pot, Palladium 23kt nib, ... which make its writing instruments even more special.

Visconti offers a wide range of high quality items, regular, limited, HRH, bespoke. All products show strong attention to detail and unique features. Visconti is focused to be a niche manufacturer of extraordinary writing instruments, being able also to offer dedicated projects to very special customer. Luxury is not given only by the price, but most of all by the uniqueness of the piece, the special manufacturing process, the craftsmanship skills used, the materials, the finishing. Thanks to the capabilities of its Italian Atelier in Florence, Visconti is able to offer customized products with a unique design and a highly-personalized production for very special people.

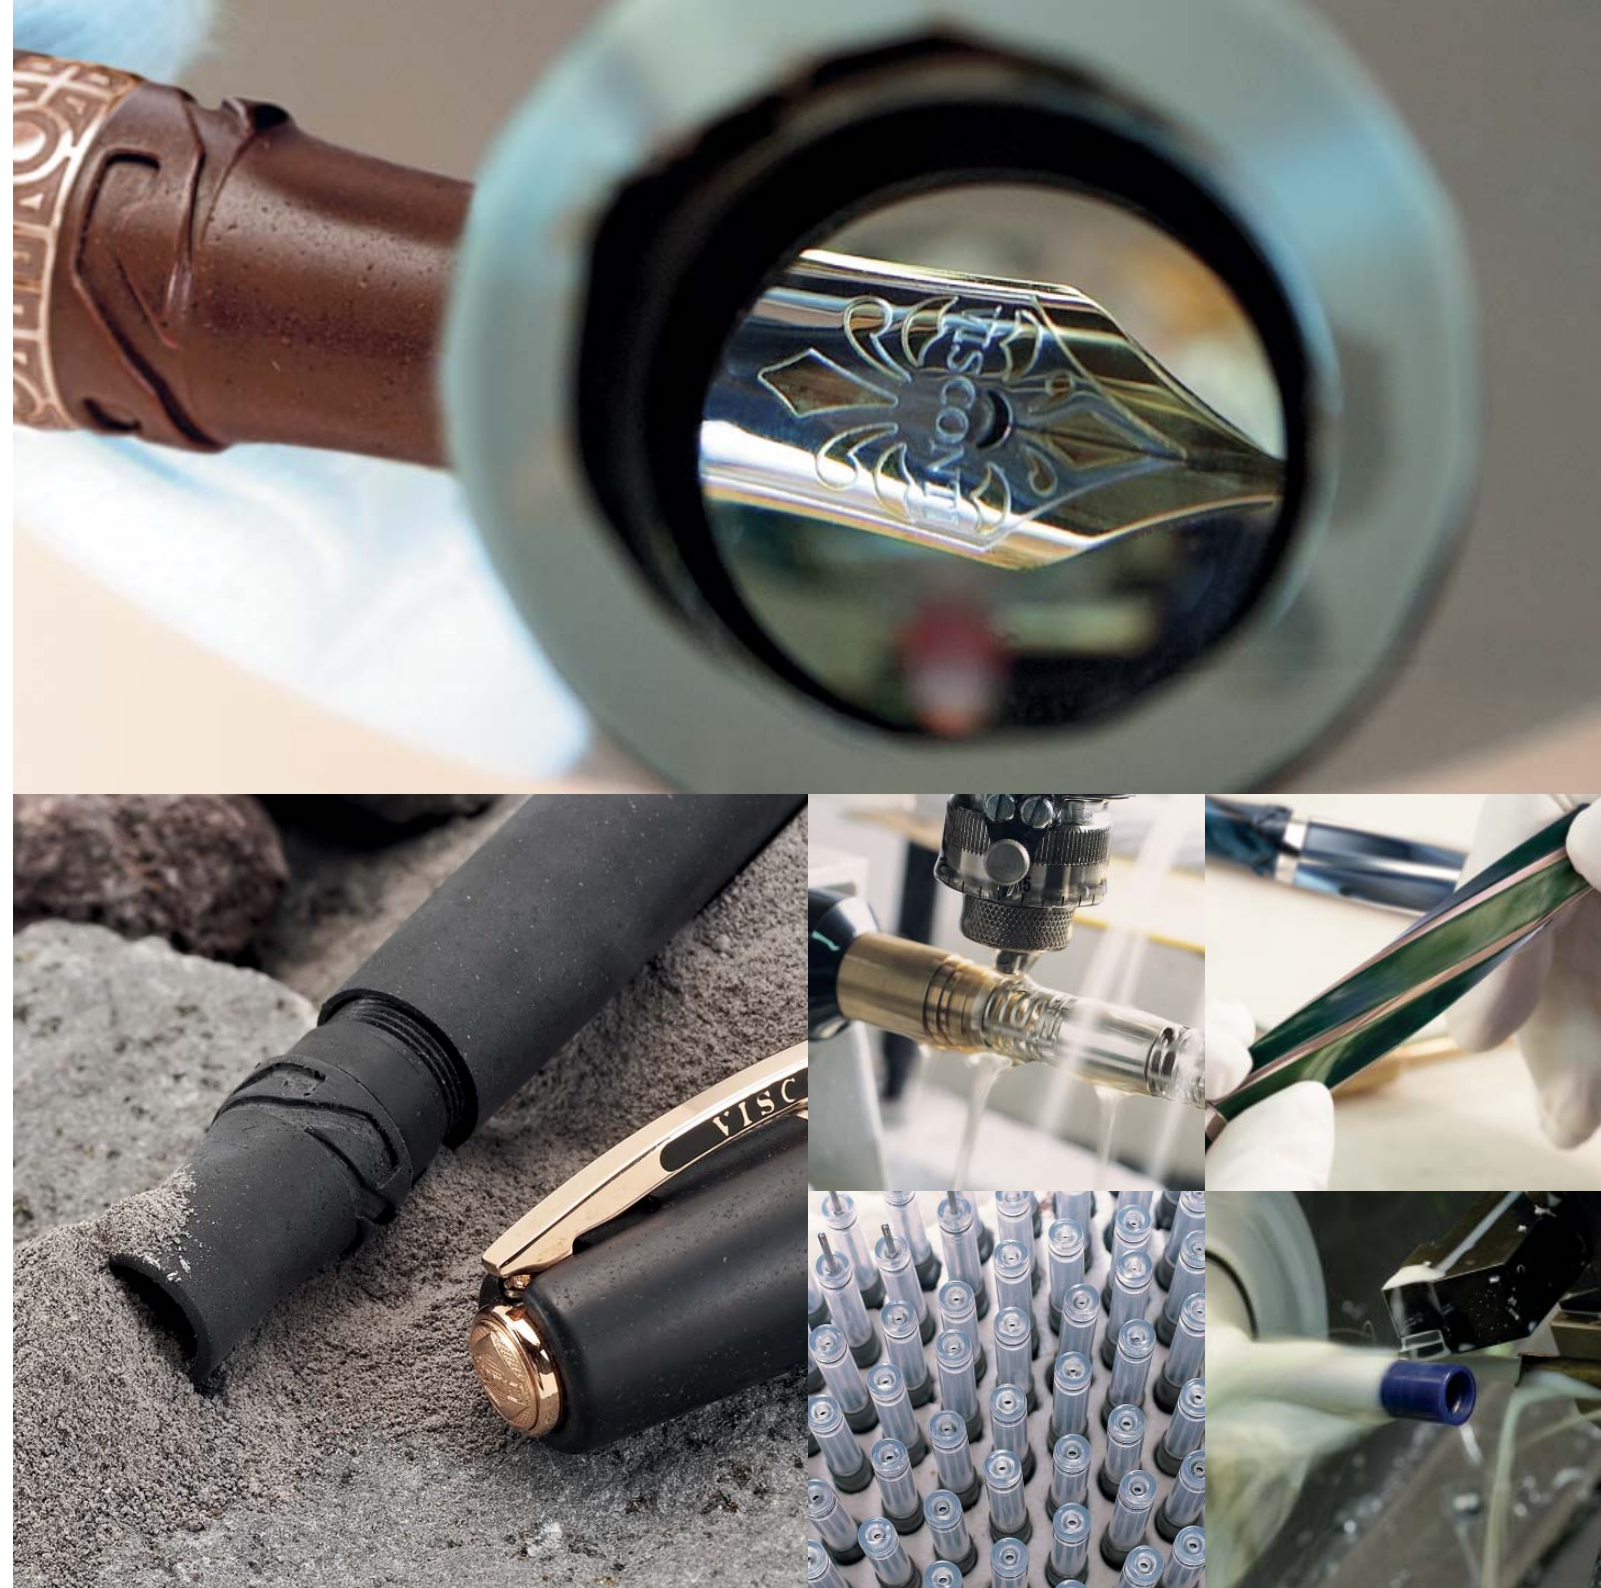

La storia di Visconti nasce in Italia, nella città di Firenze, capitale dell'arte e della cultura. Firenze è anche uno dei più grandi centri della moda italiana e dell'industria di lusso dai quali Visconti si ispira e ogni prodotto incorpora alcune di queste caratteristiche distintive.

Da tanti anni il nome "Visconti" è sinonimo di strumenti di scrittura straordinariamente eleganti provenienti da una ricerca storica e tecnologica molto intensa: stilografiche, roller e penne a sfera.

Visconti, da un lato, ha riscoperto e conservato vecchie tecniche di artigianalità, rendendole adatte per gli strumenti di scrittura. Inoltre, la ricerca di nuovi materiali è un punto forte di Visconti (lava vulcanica, carbonio unidirezionale, cotto ...).

Oggi Visconti è una delle realtà più importanti del mercato mondiale delle penne di lusso e ha introdotto molte soluzioni tecniche innovative, quali il sistema di bloccaggio del cappuccio, il sistema di riempimento a doppio serbatoio, il calamaio da viaggio, il pennino in palladio a 23 Kt., che rendono ancora più speciali gli strumenti di scrittura.

Visconti offre una vasta gamma di articoli di alta qualità, regolari, limitati, HRH e su richiesta. Tutti i prodotti mostrano una forte attenzione ai dettagli e alle caratteristiche uniche. Visconti si distingue per essere produttore di strumenti di scrittura straordinari, in grado di offrire anche progetti dedicati a clienti molto speciali. Il lusso non è dato solo dal prezzo, ma soprattutto dall'unicità del pezzo, dal particolare processo produttivo, dalle abilità artigianali usate, dai materiali e dalla finitura. Grazie alle capacità del suo Atelier italiano in Firenze, Visconti è in grado di offrire prodotti personalizzati con un design unico e una produzione altamente personalizzata per persone molto speciali.
